### Source Scientific Appoints Vice-President, Business Development

*Source Scientific, a BIT Group Company located in Irvine, CA, announces appointment of new Executive Team Member.*

Irvine, CA....Source Scientific, a BIT Group Company, has appointed Mr. Steve Maylish to the position of Vice President, Business Development. Over his more than twenty years of experience within the medical device industry, Mr. Maylish has served in such executive positions including Director of Business Development, Director of Marketing, Director of Hardware, and Senior Product Manager. In addition to his recent experience in another medical instrumentation development company, Mr. Maylish has been associated with several well-known medical companies including Johnson & Johnson, Shiley, Baxter Healthcare and Edwards Lifesciences.

Mr. Maylish has an MBA, a B.S. Degree in Business, and an A.S. Degree in Electronics. In his position as Vice President, Business Development with Source Scientific, Mr. Maylish will be focusing on the strategic advancement of customer development for the company's engineering and contract manufacturing services.

Source Scientific, LLC ( [www.sourcescientific.com](http://www.sourcescientific.com) ) designs, develops and manufactures medical devices and laboratory instruments. In June 2007, Source Scientific joined with BIT Analytical Instruments, Inc. based in Ludlow, MA USA and Schwalbach Germany and became a BIT Group Company. All BIT Group facilities function in clean, cell based manufacturing areas, based on the Kaizen philosophy of one piece work flow, ensuring superior production quality. An optical lab, wet test lab, design engineering centers and electronics testing lab are key areas where BIT Group provides innovation and superior quality for its customers. BIT Group provides single source from design and manufacturing to after-sale service with the highest quality standards according to ISO13485-2003 and ISO 9001-2000 and FDA registration.

BIT Group is the first OEM-Manufacturer of complex medical instrumentation that offers development, manufacturing and field service as well as complete FDA quality certification.
